(a) Imports relate to the State in which the import entry was lodged with the Australian Customs Service. Foreign import data are compiled on the Harmonised Commodity Description Coding System (HCDSCS), not the Standard International Trade Classification (Revision 3). (b) Excluding non-merchandise trade. (c) These are selected major groups only and therefore do not add to the totals shown. Imports are recorded statistically in the calendar month in which the import entries are both finalised by the Australian Customs Service and passed to the ABS for further processing. (d) Manufactured goods not included in the other selected commodity groups listed in this table.

(a) From September quarter 1991 and September quarter 1992, respectively, data are not comparable with those for previous periods as some caravan parks previously classified as short-term were reclassified as long-term. (b) Including both on-site van sites and other powered sites. (c) From September quarter 1992, caravan park sites, etc. permanently reserved but only casually occupied by their tenants have been recorded continuously as site nights occupied irrespective of whether the tenants of individual sites were in residence on any particular night. Occupancy measures from September quarter 1992 are not therefore comparable with those from previous quarters.
